

MAKER ELECTRA 3X PLUS

Description

Inhibited dielectric oil for special applications. Formulated with isoparaffinic base stock highly hydrogenated. Recommended for use in electrical equipment when high oxidation resistance and very low sulphur content is required.

Caution

Any type of contamination (humidity, particles, etc.) can negatively affect the properties of the product. Special attention must be paid to avoid polar contaminants.

Properties

- Excellent cooling properties
- High oxidation stability and high dielectric breakdown voltage
- High resistance to sludge and deposit formation
- Very low sulphur content

Quality levels, approvals and recommendations

- ASTM D3487 type II
- IEC 60296 type A <<HIGH GRADE>>
